Hi Jason - Just finished the feature in
Car Collector mag, and really enjoyed
the variety of cars/projects which
your creative spirits have worked upon.
Your term of "converted Restoration" also
struck a harmonious chord with me:
As I've used a variety of terms to describe
the few rides I have had done but all
seemed a bit off. The mark just see-
ing that mid-1930s silver & blue convert
brought back the memories; your color choice
really sets it off great. I never saw it like that.
Your Workshop is indeed in a great place
and your office view can't be beat, I bet!
The red-Devil machine is beyond my own scope
but the process of its build was truly fascinating!
Horsepower is something we can all appreciate
and understand and it sounds like a true
time-warper...
